KPIs Cards

Total Orders

1200

Total Revenue

1,264,761.96

**Average Order
Value**

1,053.97

Total Customers

1,189

Products

7

**Average Quantity
per Order**

2.95

Chair Generated the Highest Revenue

Chair generated the highest revenue, indicating strong customer demand and higher sales value compared to other products.

Printer Received the Highest Number of Orders

Printer had the highest number of orders, while Phone had the fewest.
This indicates that product demand varies across categories.

Online Payments Were the Most Frequently Used Method

Online was the most frequently used payment method, while Credit Card generated the highest revenue

Revenue by Referral Source

Instagram outperformed all other referral sources, making it the strongest marketing channel.

Sales Changed Throughout the Analysis Period

Monthly revenue fluctuated during the analysis period, showing several increases and decreases rather than a steady trend.

Key Findings & Recommendations

Key Findings :

- Chair generated the highest revenue.
- Printer received the highest number of orders.
- Instagram was the strongest referral source.
- Monthly revenue fluctuated over time.

Business Recommendations :

- Continue investing in Instagram marketing campaigns.
- Promote low-performing products such as Phone.
- Monitor monthly sales trends to improve inventory planning.
- Focus on high-revenue products to maximize business growth.
